Mergent Online provides access to one of the most complete historical financial databases ever assembled. You can find U.S. and international company histories, annual reports, fact sheets, financial and industry reports, 30 years of stock data, and more. You can look up information on a specific company in Mergent Online, or conduct research to find all companies that fit certain criteria.

When you perform a Company Search, you will see a tab labeled “Company Details,” which provides basic information about the company and key financial data. Other information retrieved includes information on key executives, ownership, detailed company financial information, equity pricing, reports, SEC filings, news articles, and competitors. Annual reports for some companies are available from the late 1990’s. Select the tab for the type of information you want to see. Note also the grey links to additional topics under the blue tabs, such as Subsidiaries, Long Term Debt, Capital Stock, etc.
When you select the **Reports** tab, you will be able to view and/or download company Annual Reports, Industry Reports, and Buy/Sell/Hold Reports. The **Filings** tab provides Government documents filed by the company. The **Competitors** tab displays a list of competitors based on industry codes and financial highlights. The **Report Builder** enables you to create a customized report on a single company or multiple companies.

When you select **Advanced Search** at the top of the home page, you will be taken to the following page. Notice the various criteria that you can use to search for corporate information, including company name, state, city, year incorporated/founded, stock exchange, number of employees, number of shareholders, etc.

When searching for **Executives**, you can select from the criteria displayed below:
When searching for company financial data, you can select from the following criteria:

Click on the tabs for Industry Codes, Pricing, Ratios, etc. to see the criteria you can use in these types of searches.

Mergent Online also provides in-depth information on foreign countries. You can access country information on either the Basic or Advanced Search screen by selecting a country from a list within a grey box on the right side of the screen labeled Country Profile. There are country profiles for 100 countries. Each country profile provides an overview of the country’s economy, its top industries, imports and exports, budget figures, securities trade, geography, history, people, and transportation. Information on the country’s stock exchange and corporate filing practices is also given.

To access a list of companies doing business in a particular country, go to the Basic Search page and select a country from the box labeled Country (see next page). The company list for each country provides the SIC code for the company and indicates whether it is a public or a private company. Selecting the link to the company name takes you to the Company Information page for that company.
You can use **Mergent Online** to create a customized company report, to compare a company with other companies in the same industry, and to create a list of companies and build reports on them all at once. For more information on how to use this database, see the link to **Help** in the upper right corner of the search page, or select the following link:
