

Are you wondering how to take your business to the next level of global excellence?

Your company can now learn the Lean Organization techniques that are the backbone of the

Toyota Production System and that have been taught to and implemented by numerous highly successful companies including Boeing, General Electric, Harley Davidson, John Deere, Mercedes Benz, Rolls Royce, Lockheed Martin, General Motors, and Yorktowne, among many others.

The DCC/UK Lean Organization program provides coursework from the "Champions Level" of training taught by the University of Kentucky's Center for Manufacturing. Based on the Toyota Production System, this world-renowned program is geared toward **supervisors, plant managers, team leaders, and corporate management** and is now available in the Southside Virginia region. For information on this or other world-class Lean Organization training programs, please contact DCC Workforce Services at:

**DCC's main campus is at:
1008 S. Main St., Danville, VA 24541**

**DCC is an Equal Opportunity/
Affirmative Action College
Member, Virginia Community College System**

Lean Organization Training

**Affordable, Effective World-Class Training
Available on a Local Level**

**Learn
"Lean"**

TOYOTA *the way*

The Toyota production system is legendary in its success. Toyota set the standard for world-class manufacturing, and for years companies across the globe have been trying to learn the secret of Toyota's success. Finally, the opportunity has come to Southside Virginia.

In 1993 Fujio Cho, the President of *Toyota Motor Manufacturing Kentucky*, issued a challenge to the University of Kentucky: Study the Toyota production system to learn why it was so successful and then teach that system to other companies.

The university accepted the challenge and formed the University of Kentucky's Center for Manufacturing, which is now recognized as a world leader in Lean Manufacturing.

Through a special partnership between DCC and the University of Kentucky, Virginia employers can now learn firsthand from the experts how to emulate the Toyota success story and help their company become . . .

World Class!

Basic Courses:

- Principles and Practices of Lean Production Systems
- Lean Operations Management
- Organizational Learning for the Lean Enterprise

Advanced Courses:

- Lean Value Stream Design
- Management for a Lean System
- Leadership for the Lean Enterprise

Upon completion of all six courses and passing a written exam, participants are awarded the prestigious *Lean Systems Certificate from the University of Kentucky's Center for Manufacturing.*

"This program is so comprehensive. It takes you through the whole philosophy. Other training usually just teaches the tools. This program teaches the philosophy in combination with the tools." --Bill Duarte

Industrial Engineer, Columbia Forest Products

"The management team that went through this program has been able to apply what we've learned even to the start-up phase of our plant here. We've applied staffing strategies, and we've modeled our organization around the structures we've learned in class." --Doug Agner

Danville Operations Mgr, Yorktowne Cabinetry

"The DCC/UK partnership presents some real ground-breaking opportunities. Ordinarily, community colleges don't have the funds or other resources to offer this caliber of training. Employers would usually have to send their employees on extended travel to participate in something like this, and that can really get expensive. The partnership we have developed with the University of Kentucky enables us to offer this top-notch training program on a local and highly affordable level." --Jeff Arnold

DCC Director of Business, Industry, and Economic Assistance

The DCC/UK Lean program is composed of six modules. Traditionally, students complete one module a week, attending class for three 8-hour days per week; however, program scheduling is flexible and can be adjusted to meet the varying needs of employers. The DCC and UK staffs are eager to review your company needs and discuss how Lean can help your organization move to the next level.
